

Reveal

Visitor analytics & HACCP compliance
for Avigilon Alta cameras

May 2026 · raptix.se · stefan@raptix.se

Cameras you already paid for. Data you never see.

- Stores running Avigilon Alta use it for one thing: security.
- Those same cameras already capture rich metadata — people counts, queue lengths, fridge temperatures, occupancy patterns.
- Today: gut-feel staffing, paper HACCP folders, manual weekly reports in Excel.
- One hour per store per week × 14 sites = two working days a month lost to manual reporting.

2 days

per month, per district manager,
lost to manual reporting

14 stores × 1 hour/week

Reveal turns Alta metadata into live retail insight.

01

Live overview

Visitors, queue, occupancy — per site, live.

02

Insights

Hour-of-week heatmap, weather correlation, peak forecasts.

03

HACCP

24/7 temperature logging + audit-ready PDF.

04

In-store screens

TV-ready dashboards, share by link.

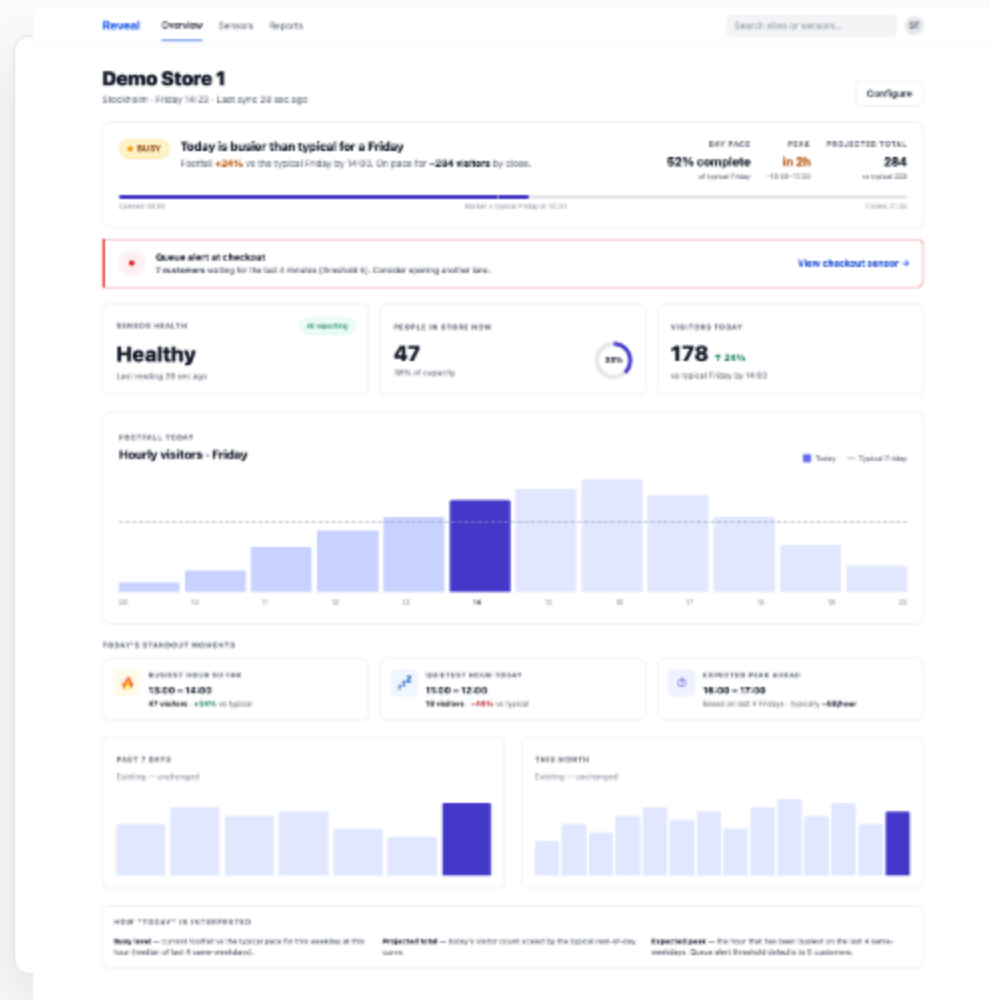

05

Automated reports

Weekly + monthly via email, per sensor.

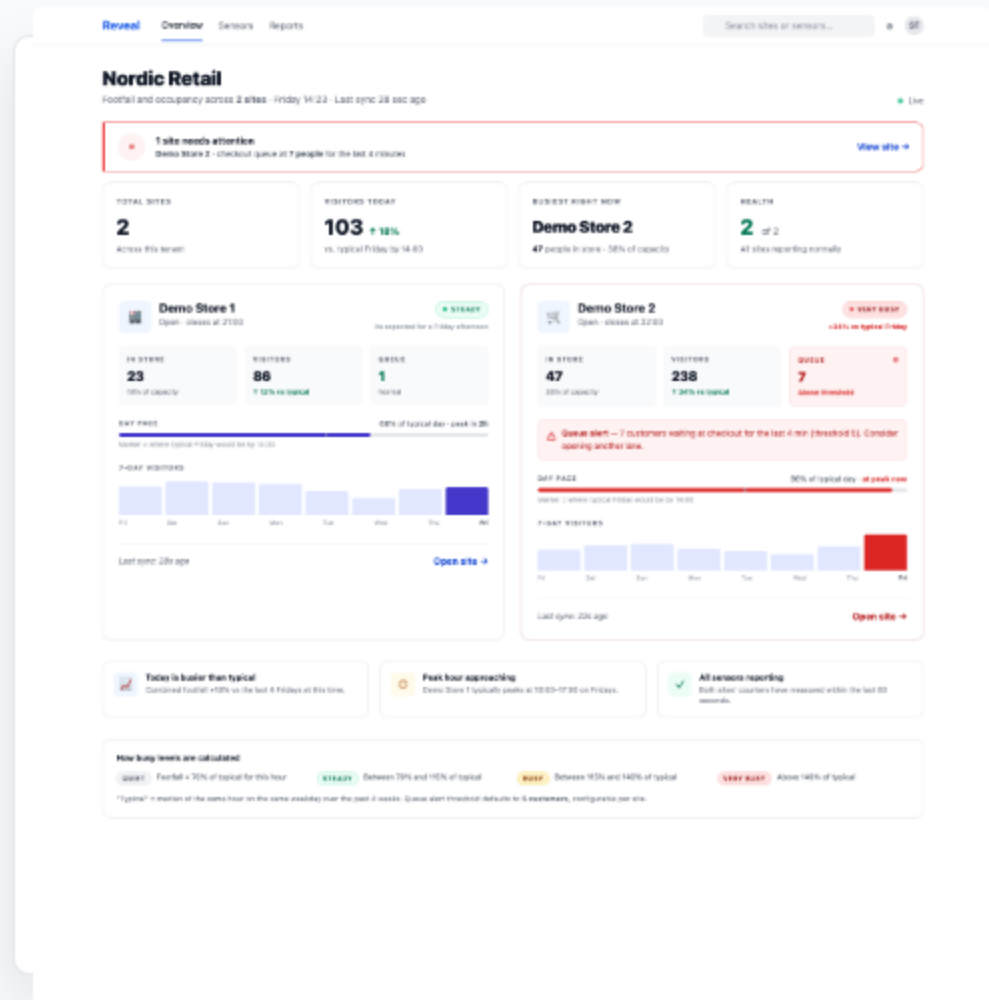

- Connect your Avigilon Alta account once. Automatic discovery of every counter and sensor.
- Historic data imported on connect — start with weeks of trends, not an empty dashboard.
- No new hardware. No second sign-in. No CSV uploads.

Live store overview

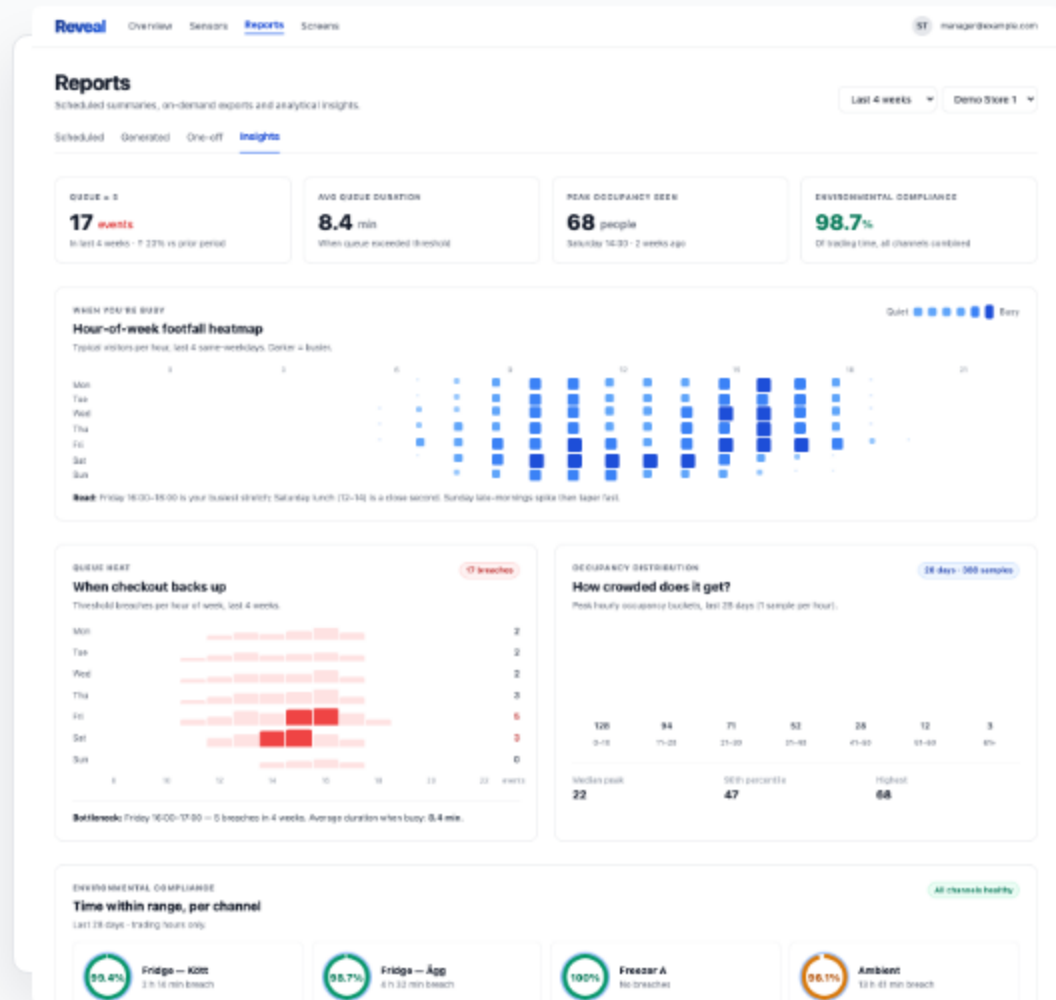

Live visitor counts, occupancy, queue alerts, weather-correlated trends — per site.

Multi-site fleet view for chains

Every store side by side. The district manager sees instantly which site needs attention.

HACCP compliance on autopilot

24/7 temperature logging, audit trail, ready-to-file PDF reports for food-safety inspection.

TV-ready dashboards, no login required

Share by URL + password. Mount any screen behind the counter or in the break room — auto-refreshes every 30 seconds.

Pricing

STARTER · MONTHLY

\$50

per site · per month

WHY REVEAL

"The cameras are already there. The data is already there. Someone just needs to surface it for the people running the store."
